**Secretary Antonio G. Rivera**  
*Phone (760) 339-9081*

#### **Water Flow Measurement Classes.**

With the implementation of the equitable distribution pilot program for 2008, IID is offering monthly instruction on water flow measurement to its water users. Instructors will teach measuring procedures for both over-pour and under-pour applicable for delivery gates and tailwater boxes. Classes will be offered by appointment only from noon to 1 p.m., the same day and location the WCAB meets (the second Thursday of each month (except August) at the Water Control Conference room in Imperial). Instruction will be provided in English and Spanish languages. For more information and to make an appointment, contact Antonio Rivera in the Irrigation Management and Monitoring Unit at (760) 339-9081 or via email at: agrivera@iid.com
