

Jesus Nieblas

Interim Chief Information Officer, Imperial Irrigation District

Jesus Nieblas serves as interim chief information officer for Imperial Irrigation District. His primary responsibility is to plan and direct the implementation and maintenance of the district's information technology systems, coordinating the activities and personnel of each unit in the Information Technology Department in support of efficient and effective operations.

His duties include directing the development and implementation of measures to ensure the integrity and availability of the district's information technology system, including enterprise business applications, data center facilities and operations, data and voice communication networks and systems, cyber security, geographic information system, records management, end-user desktop hardware and software systems and internet and intranet system activities.

Mr. Nieblas has extensive experience working in multiple areas of the district in both the Energy and Information Technology departments since joining the IID in 1992 initially as a computer trainee and later as drafting technician, personal computer technician and business area analyst.

In his 25 years of service to the district, his responsibilities include multiple supervisory positions, each with increasing levels of responsibility in the areas of internal controls, energy process improvement, business improvement, information systems and business applications administration.

His work includes developing a new organizational structure to better align customer needs to the organization, to applications and to technical services with the goal of maximizing the effectiveness of resources. He also leads the implementation and upgrade of the district's business and communication systems to automate processes.

He is a 2004 graduate of the University of Phoenix where he earned a bachelor's degree in business/e-business.
