PROGRAM OVERVIEW AND POLICIES

Introduction

IID's energy management programs are designed to help customers use energy efficiently, protect the environment and save money.

Energy management programs provide a variety of services in the areas of energy efficiency, investment in renewable resources and demonstrations of new energy efficient technologies.

Energy efficient upgrades to your home and business improve operating costs and profitability, protect the environment and assist the IID in lowering the cost of power generation.

About the Energy Rewards Program

The Energy Rewards Program is applicable only for IID customers within the district's service area. The program offers rebates to all customers for the purchase of qualifying energy efficiency products and services. Qualifying equipment must replace old equipment with new, energy efficient equipment. For non-residential customers, the upgrades must meet and exceed Title 24 standards in effect at the time of installation.

The Energy Rewards Program rebates are paid by check directly to the customer or to a qualified third-party payee designated by the customer.

Qualifying products or services must be purchased, installed, and applied for by December 31, 2026. Only December 2026 purchases may qualify if the application is submitted before March 1st, 2026.

Additionally, 2025 purchases may qualify if the application is submitted before March 1st, 2026.

The program has a limited budget; therefore, rebates are paid on a first-come, first-served basis, until the deadline or allocated funds are depleted, whichever occurs first. First-come, first-served status will be determined by the date the rebate form arrives at the IID mailing address on the application form. Customers are encouraged to submit their rebate forms as early as possible. **Funding is limited and rebates are not guaranteed.**

Customer Eligibility

The program is open to all IID customers. Non-residential applicants include commercial, industrial, municipal, government and agricultural customers.

Wind, solar and other types of self-generation customers are eligible for Energy Rewards Program rebates on a prorated basis if they purchase electricity from IID. The amount of the rebate depends upon the percentage of the customer's total energy usage that is provided by IID. Example: If you generate 25 percent of your total monthly kilowatt-hour usage and IID provides the remaining 75 percent, you would be eligible for 75 percent of the Energy Rewards Program incentive levels printed on the rebate form.

Rebate Limits

Residential customers may receive up to \$5,000 in rebates each year and non-residential customers may receive up to \$10,000 per year. Furthermore, any rebate offered for any selected measures may not exceed 50 percent of the total cost, including installation, if applicable, for such measure.

PROGRAM OVERVIEW AND POLICIES

Installation costs include labor fees. Customers who self-install may not charge installation labor; this charge applies to vendors only. Sales tax and freight (shipping) are not to be included in the item's purchase price.

Eligible Energy Efficient Equipment

All equipment installed must be new. Used or rebuilt equipment does not qualify for Energy Rewards Program rebates. IID will not allow fuel switching; electric equipment can only be replaced with qualifying electric/solar equipment. New construction does not qualify.

A complete list of qualifying measures and equipment requirements is included in Section 2 of this document. Please be sure to read the technical requirements for each measure before purchasing equipment. Contact IID if you need assistance in determining if the equipment you wish to purchase meets program requirements.

It is important that you include the manufacturer's technical specifications sheet with your rebate form for IID's timely verification of qualifying rebate applications. This is especially important if you are unsure about the eligibility of the equipment you purchased for a rebate. IID will make a final determination as to whether the equipment qualifies for a rebate.

Applying for a Rebate

Rebate Form and Reserving Rebate Funds

IID enables you to submit a rebate request online, by email, by mail or by fax. By applying online, you will also be able to track the progress of your rebate request.

To submit online requests for Energy Reward rebates, simply follow these easy steps:

1. Go to <https://myaccount.iid.com/portal/>.
2. Click on "Rebate." Then, enter your IID Contract Account Number and zip code. Click "Submit."
3. You will now see the incentives (residential or commercial) for which you qualify. Find the appropriate measure (HVAC, for example) and click "Apply."
4. Your account information will appear pre-filled on screen. Complete the remaining required fields indicated with * if your mailing address is different from the service address or you need payment to go to a third party.
5. Enter the Product Details of the purchased system.
6. Upload the invoice and AHRI certificate. Please be sure to include the brand, model and serial numbers on the invoice.
7. Completion of the Contractor Details section is not needed unless the contractor is completing the rebate request.
8. Click on "Submit" to complete the process.

If you wish to submit a rebate by mail, email or fax, you can download the rebate forms at www.iid.com/ResidentialRebates. You may also contact IID to request a rebate package at EnergyRewards@iid.com or 1-760-482-3656 (Imperial Valley) or 1-760-396-5656 (Coachella Valley).

Rebate funds are available on a first-come, first-served basis. The completed rebate application must be received by December 31, 2026.

Pre-Inspections

All projects qualifying for a rebate amount of \$5,000 or greater require pre-inspection and pre-approval by IID.

PROGRAM OVERVIEW AND POLICIES

Non-residential energy efficient technologies not covered under the Energy Rewards Program may be considered under the Custom Energy Solutions Program and require pre-installation inspection and pre-approval. For more information on the Customer Energy Solutions Program, please visit www.iid.com/CESP or call 1-760-482-3682.

Installing Your Equipment

It is the customer's sole responsibility to select, purchase, install and maintain qualifying measures or to hire a vendor to provide these services. Customers may choose either the self-installation or contractor installation methods detailed below.

Self-Installation

All equipment must be installed pursuant to the manufacturer's specifications and according to all applicable federal, state and local laws, including, but not limited to, building codes and regulations.

Contractor Installation

It is the customer's responsibility to ensure the contractor is properly licensed and the appropriate permits are pulled for the project. For more information on contractor licenses, contact the Contractor State Licensing Board by calling 1-800-321-CSLB or visiting the website at www.cslb.ca.gov. Also, please contact your local building department regarding the possible permit requirements for your project.

While **HVAC replacements** and **attic insulation installations** may be completed via the self-installation method, customers electing to use the contractor installation method must choose a contractor from **IID's Participating Contractor List**. The list is available at www.iid.com/ParticipatingContractors or by calling the IID Rebate Processing Center at 1-760-482-3656 (Imperial Valley) or 1-760-396-5656 (Coachella Valley).

Prior to the installation of the equipment, the requirements in Section 2 should be reviewed for each measure. Be advised that the equipment for which you are applying for a rebate must be purchased and installed prior to submitting your rebate form.

Proof of Purchase

You must include proof of purchase with each rebate form for equipment or measures purchased. This documentation should include the following information:

- description of each type of equipment installed;
- make or brand name and model number(s);
- serial number(s) (if applicable);
- quantity installed;
- cost per unit;
- sales tax;
- date of purchase; and
- vendor contact information (if applicable).

It is very important to include the description, make and model of the equipment purchased. This information is compared against various equipment databases to verify that your equipment qualifies for a rebate. If your documents do not include this information, you must submit a manufacturer's specification sheet with your rebate form. Estimates, proposals, quotes and copies of cancelled checks do not constitute proof of purchase. The following are examples of accepted proof-of-purchase documents:

PROGRAM OVERVIEW AND POLICIES

- **Receipts.** If the energy efficient equipment covered under this program is self-installed, proof of purchase will be in the form of a cashier's receipt that includes all of the information listed above.
- **Contractor Invoices.** If a contractor installs equipment, proof of purchase will be the paid invoice. Please ensure the contractor indicates "Paid" on the invoice and that the invoice is itemized (see Appendix A).
- **Equipment Leases.** Rebates are not available for leased equipment.
- **Purchase Orders.** Itemized purchase order must include a letter from the customer stating date of purchase and outlining all paid itemized measures and materials costs.

Proof of Service Completion

Customer must provide proof of service completion for the HVAC Tune-Up Service via the completed and signed original Energy Rewards Contractor's Report and a receipt for the service performed with the date of service on each document.

Completing the Rebate Form

Complete one rebate application per each account, per each measure. Ensure each rebate form includes the IID Contract Account Number for the area in which you are installing the equipment. If you are not sure which area within the facility corresponds to each IID Contract Account Number, please contact an electrician or facility manager.

To complete an online application for the Energy Rewards Program rebate application, go to www.iid.com/rebates.

When you sign the Energy Rewards Program online rebate application, you are signing a contract stating that you agree to the Terms and Conditions outlined in the Agreement section of the Energy Rewards Program rebate form. By signing the Agreement, you are certifying that the equipment was purchased and installed *prior* to submitting your rebate form.

Your signature for equipment or measure purchases also denotes that you agree to continue using the installed equipment for the service life of the product(s) as per the manufacturer's recommendations or for five years, whichever is less. If you do not provide this benefit, IID has the right to seek a refund for a prorated amount of the rebate paid to you, depending on the period of time that you provided the related energy efficiency benefits.

The following scenarios outline various situations for which IID may seek refund of rebates:

- **If the equipment is not installed.** By signing the Agreement, you are guaranteeing that you have purchased and installed the equipment. If the equipment is not installed and functioning, no energy savings are being provided; therefore, IID has the right to a refund from you of 100 percent of the rebate paid, even if you designated the rebate payment to a third-party payee.
- **If you relocate.** If you change your service address and close your utility account at that address, IID has the right to invoice you for a prorated portion of the rebate amount paid to you for equipment, service or measure purchases. Assuming that the equipment remains in use at the service address, you will not owe a refund if the account becomes active again within 24 months through reconnected service by a new tenant or owner, or if the account is only inactive temporarily (less than 90 days).
- **If the equipment is removed.** If you remove equipment for which you have received an Energy Rewards Program rebate, IID has the right to invoice you for a prorated portion of the rebate amount paid to you.

PROGRAM OVERVIEW AND POLICIES

- **If the equipment failed.** If the equipment is no longer operating, you are responsible for replacing it with equipment that offers the same energy savings as the measure for which you received a rebate. If you do not replace the equipment, IID has the right to invoice you for a prorated portion of the rebate amount paid to you. Check your vendor contract to determine if your equipment is under warranty.
- **If a generator is installed.** If you install a generator at your facility and the generator provides power to equipment for which you received a rebate for installing energy efficient equipment, you are no longer providing IID with energy-saving benefits. In such cases, IID has the right to recover the rebate paid to you or a portion or prorated amount.

Submitting a Rebate Form

IID will accept Energy Rewards applications exclusively through its online portal found in www.iid.com/rebates.

Choosing and Working with a Vendor

Vendors may contact and solicit eligible IID customers offering to retrofit their facilities with energy efficient equipment and to facilitate customer participation in the Energy Rewards Program. Vendors may even maintain their own supply of Energy Rewards Program rebate forms and they can explain the program to you and help you identify potential retrofits at your home or business. These vendors are not IID affiliates neither affiliates' employees – they are individual contractors utilizing IID's rebate program to market rebate qualifying products and equipment.

While **HVAC replacements** and **attic insulation installations** may be completed via the self-installation method, customers electing to work with a contractor for these particular products or for HVAC maintenance service must choose a contractor from IID's Participating Contractor List. The list is available at www.iid.com/ParticipatingContractors or by calling the IID Rebate Processing Center at 1-760-482-3656 (Imperial Valley) or 1-760-396-5656 (Coachella Valley). The Participating Contractors List is only for use with the HVAC replacements and attic insulation installations and is not applicable for use in selecting contractors/vendors for other products. Contractors on the list have an active California State Contractors License, general liability, auto and workers' compensation insurance (if required by the state) and have signed IID's Contractor Code of Conduct. To learn more about the participation requirements, please visit www.iid.com/ParticipatingContractors.

You may choose to work with a vendor to purchase and install qualifying equipment; however, you are responsible for obtaining your own vendor(s). For the purposes of the Energy Rewards Program, vendors are defined as any third-party payee listed by the customer on the rebate application and may include, but are not limited to:

- equipment manufacturers, distributors, wholesalers or retailers;
- equipment contractors (installers; and
- energy service providers.

While certain HVAC and attic insulation contractors have been prescreened and are included in the Participating Contractor List, IID maintains no affiliation with, or endorsement of, individual vendors or contractors through the Energy Rewards Program. You should select your vendor with the same care you may select any other service provider you hire. Additionally, license requirements are solely the responsibility of the vendor; however, it is the customer's responsibility to certify that the improvement or installation has complied with any applicable permitting requirements and, if a contractor performed the installation or improvement, the said contractor holds the appropriate license for the work performed. Please note, a non-

PROGRAM OVERVIEW AND POLICIES

ducted air conditioning system will be considered under a Ductless Mini-Split rebate, while a ducted air conditioning system will be considered under an HVAC or HVAC-Gas to Electric rebate.

If the new, energy efficient equipment is removed or found to be deficient, you are responsible for replacing it even if your vendor was the recipient of the rebate; otherwise, you are subject to refunding IID a prorated amount of the rebate. Therefore, make sure that you thoroughly understand your vendor's contract, including your equipment warranty.

If you experience an equipment problem or if you are not satisfied with the quality of work of a vendor you hired, contact the vendor directly to resolve the issue. In no event is IID responsible for equipment problems or issues with your vendor.

Releasing Payment to Third Parties

You may have your rebate payment released to a third-party payee. To make your rebate check payable to another party, designate in the space provided on the rebate application for third-party payee rebate assignment. You must sign the rebate application to have your rebate payment released to the designated third party.

When the rebate is paid directly to you or any other third party, you are still responsible for ensuring that the equipment provides the energy savings as specified in the Agreement on your rebate application.

If the third-party payee is a business, an Internal Revenue Service Form W-9, Request for Taxpayer Identification Number and Certification, must be submitted with the application.

Rebate Processing

Upon receipt, your rebate form will be reviewed by IID to ensure the form was completed correctly and that the packet includes all the necessary documentation. The packet must be complete before it is approved for processing.

Incomplete Rebate Forms

If your rebate form is incomplete, IID's Rebate Processing Center representatives will try to reconcile information with you, your vendor or with utility resources. This process may include a phone call from IID or the return of the rebate form to you with a letter describing the matter.

Post Inspection

Prior to issuing rebate checks, IID, at its sole discretion will conduct post inspections to verify that measures are installed and operating. If inspectors determine that the measure for which you applied for a rebate is not installed at your facility or is not operational, your rebate application will be rejected. If your rebate application is rejected, you may submit a new rebate application after the equipment has been installed and is operating, provided that funds are still available.

If inspectors determine that the measure for which you applied for a rebate is only partially installed, you will be rebated only for the qualifying equipment that is installed and operating.

You must provide inspectors access to the equipment for verification purposes during normal business hours: 8 a.m. to 5 p.m., Monday through Friday, excluding holidays.

If you refuse to allow the inspector access to the eligible equipment, your rebate application will be rejected and no rebate will be paid.

PROGRAM OVERVIEW AND POLICIES

Rebate Check

Rebate Adjustment

If you have received your rebate check and you are disputing the amount of the rebate, you have 45 calendar days from the date of the check to call IID's support line for assistance. IID will investigate the matter and you will be notified of the results. If an adjustment is warranted, you must return the original rebate check to the IID and a new check in the correct amount will be issued. If you cashed the check and qualify for a higher rebate, you may be required to submit an additional rebate form. If you have cashed the check and the rebate should have been less, you may be invoiced for overpayment at IID's discretion. In each situation, IID's decision is final.

Stop-Payment and Check Reissue

Call IID's support line if you need to stop payment on a check and/or if you need a check to be reissued for any reason including:

- **Payee name change.** If the name of the payee has changed, provide updated information, including name, mailing address and telephone number. Please return the original check as directed and a new check will be issued to the correct party.
- **Check lost, stolen or misplaced.** If your check is lost (or never received), stolen or misplaced, please contact IID immediately to arrange for a replacement check.
- **Stale-dated check.** A "stale-dated" check is one that is no longer valid because it was not cashed within the allotted time period printed on the check. The original check should be returned to the IID so a new check can be issued.

Rebate Refunds

Once you receive your rebate check, you are required to adhere to the conditions of the signed Energy Rewards Program rebate applications/agreement, which in part require that you provide IID with energy savings for five consecutive years or the life of the product, whichever is less. If conditions at your facility change, you may be liable for refunding part of your rebate to IID. See "Completing the Rebate Form" for more details.

Denial Appeals

If your rebate application is denied and you would like to appeal the decision, you may submit an appeal letter to the IID Rebate Processing Center within 45 calendar days from the date of the denial letter. Appeals received after the 45-day timeframe will not be considered for payment.

Equipment Terms and Conditions

Equipment that qualifies for the Energy Rewards Program rebates must meet the Terms and Conditions. Please read them thoroughly so that you understand the requirements before purchasing equipment or measures. Please contact IID if you have questions.

PROGRAM TERMS AND CONDITIONS

1. I understand that funding is available on a first-come, first-served basis. Funds are limited and rebates are not guaranteed. Applications for rebates totaling \$2,500 or more require pre-approval from IID. This program may be modified or terminated without prior notice. Only one rebate eligible per measure.
2. I understand that all measures must be purchased and installed between January 1, 2026, and December 31, 2026.
3. I understand that the equipment must be new and installed at the residence listed on this application prior to submittal of this application. Units that do not qualify: Units that are resold, rebuilt, retrofitted, rented, awarded as a prize, purchased outside the USA, received in full or in part from insurance or warranty claims, or installed as a result of new construction.
4. I understand that the signed and dated application, copies of receipts, invoices and other supporting documentation must be submitted online at IID Connect at <https://myaccount.iid.com/portal/> or to the IID Rebate Processing Center no later than December 31, 2026.
5. I will allow, if requested, reasonable access to my residence to verify the installed item(s) noted on this application. I understand that a rebate will not be paid or I will be invoiced for the rebate amount, if I refuse a verification inspection.
6. I agree that the selection, purchase, installation, ownership and maintenance of the product or improvement listed in this application are my sole responsibility and that my supplier, installer or contractor who provided these products or improvements is not an agent or representative of IID. I also understand that, with respect to the measures I choose to install, IID makes no warranty, whether expressed or implied, including warranty of merchantability or fitness for any particular purpose. I agree that IID has no liability whatsoever concerning (1) the measures I choose to install; and (2) the workmanship of any third parties. I agree that in no event shall IID's liability for property loss or damage resulting from its activities under this application exceed the total rebate amount paid to me under this application.
7. I agree to continue using the incentivized equipment for the service life of the product (as per manufacturer's recommendations) or for five years, whichever is less. If I do not comply with this requirement, I agree that IID has the right to seek a refund for a prorated amount of the original incentive initially paid to me, based on the period of time that I provided the related energy-efficiency benefits.
8. I understand that the rebate amount per unit will be paid according to the rebate amount per unit in effect at the time the application is received by IID.
9. If a tenant, I understand I am responsible for obtaining the property owner's permission to install the product or improvement for which I am applying for a rebate. My signature on this application indicates I have obtained this permission.
10. I understand that the rebate amount cannot exceed 50 percent of the net purchase price for the measures to be installed, where the net purchase price is defined as the documented purchase cost less any taxes, shipping, insurance coverage, and incentives received from other entities (other than tax credits).
11. I understand that if I am a self-generating customer my rebate amount will be determined by the percentage of my total energy usage that is provided by IID.
12. TAX LIABILITY—Rebates and incentives are taxable. You are urged to consult your tax advisor concerning the taxability of rebates. IID is not responsible for any taxes that may be imposed on you as a result of your receipt of this rebate.
13. I certify that I will comply with all program requirements and with all applicable local, state or federal laws and property owner and/or homeowner's association requirements, if any. In instances when a contractor is required for the installation of the new measure, I understand it is my responsibility to ensure the contractor holds the appropriate license for the work performed.

EQUIPMENT ELIGIBILITY OVERVIEW – RESIDENTIAL

The Energy Rewards Program is intended to encourage customers to retrofit, upgrade and replace equipment with new, energy efficient technologies. Therefore, in most cases, rebates only apply if the new technology replaces older equipment. All equipment must be new. Used or rebuilt equipment is not eligible for rebate. Fuel switching (i.e., gas equipment to electrical equipment) and new construction do not qualify.

Qualifying Products* - Residential	Rebate	Requirements
A. ENERGY STAR® Refrigerator*	\$75/ unit	The new refrigerator must be the primary refrigerator used in the home, 18.0-cubic foot minimum in size and an ENERGY STAR certified model (visit www.EnergyStar.gov for a list of qualifying products). Limit one refrigerator rebate per installation address.
B. ENERGY STAR® Clothes Washer*	\$75 / unit	The new clothes washer must be the primary clothes washer in the home. Must be ENERGY STAR certified (visit www.EnergyStar.gov for a list of qualifying products). Limit one clothes washer rebate per installation address.
C. ENERGY STAR® Electric Clothes Dryer*	\$75 / unit	The new electric clothes dryer must be the primary clothes dryer in the home. Must be ENERGY STAR certified (visit www.EnergyStar.gov for a list of qualifying products). Gas dryers do not qualify. Limit one clothes dryer rebate per installation address.
D. ENERGY STAR® Dish Washer*	\$75 / unit	Must be ENERGY STAR certified (visit www.EnergyStar.gov for a list of qualifying products). Limit one dish washer rebate per installation address.
E. ENERGY STAR® Dual-Pane Windows*	\$2 / sq. ft.	Windows must be ENERGY STAR certified. Rebates available for retrofits only. For a complete list of qualifying ENERGY STAR® products, visit https://www.energystar.gov/productfinder/product/certified-windows/results
F. Shade Screens	\$1 sq. ft.	Qualifying shade screens must be installed only on sun-struck west-, south- and east-facing windows and block at least 80% of the solar heat gain. The screens must be installed on the exterior of clear glass windows that enclose an air-conditioned space. Windows must not be shaded by existing awnings, exterior curtains or blinds or any other exterior shading device. Please include measurements and manufacturer's product specifications with application or ensure product details are listed on contractor invoice. Motorized or retractable shade structures are not eligible for rebate.
G. ENERGY STAR® Variable-Speed Pool Pump	\$200 / unit	Pool Pump must be new, variable-speed, and ENERGY STAR certified. Unit must replace an existing single-speed or two-speed pool pump. For a complete list of qualifying ENERGY STAR® products, visit https://www.energystar.gov/productfinder/product/certified-pool-pumps/results
H. Attic Fan	\$75 / unit, electric \$125 / unit, solar	Rebates are available for solar-powered and electric attic fans. Only one fan per 1,000 sq. ft. of air-conditioned space will be incentivized.
I. Attic Insulation	\$0.30 / sq. ft.	Residence may have up to 7 inches in depth of existing insulation. If residence has more than 7 inches of existing insulation, any insulation added will not qualify for a rebate. Unless customer self-installs, insulation must be installed by an attic insulation contractor listed on IID's Participating Contractors List at www.iid.com/ParticipatingContractors . Photo(s) of before AND after completed work with new insulation must be provided with application in order to qualify for a rebate.
J. Radiant Barrier	\$0.30 / sq. ft.	Only square footage of first-floor conditioned space qualifies. Must be attached to rafters or laid over existing attic insulation. Spray does not qualify. Must have radiant heat rejection of 95% or greater and meet ENERGY STAR emissivity requirements. Include manufacturer's product specifications with application or ensure product details are listed on contractor invoice. Photo(s) of completed work with new radiant barrier must be provided with application in order to qualify for a rebate
K. ENERGY STAR® Room Air Conditioner*	\$100 / unit	For a complete list of qualifying ENERGY STAR® products, visit www.energystar.gov/productfinder/

EQUIPMENT ELIGIBILITY OVERVIEW – RESIDENTIAL

L. Evaporative Cooler	\$300 / unit	Refer to the Qualifying Product List on www.iid.com/ResidentialRebates for qualified models. Models not on Qualifying Product List do not qualify. Unit must be permanently installed, not window mounted. Must have UL-recognized components and a single or multi-duct distribution system. Must have a multi-function manual control switch or a thermostat specifically for evaporative coolers. Must be installed in the conditioned area of the home; units installed in unconditioned garages do not qualify.					
M. Ductless Mini-Split System	\$200 / unit	Ductless system(s) must meet or exceed ≥ 17.1 SEER2 and be AHRI certified. Unit must be installed directly in the conditioned space of the home by a contractor on IID's Participating Contractor List available at www.iid.com/ParticipatingContractors .					
N. ENERGY STAR® Thermostat	\$50/unit	To qualify, the thermostat must be listed on the Energy Star website: www.energystar.gov/productfinder/product/certified-connected-thermostats/results Limit of two thermostat rebates per household.					
O. HVAC – Gas to Electric	\$400/ton	Must meet the following to qualify: 1) Electric heat pump HVAC system must be new and replace a gas furnace HVAC system. 2) New ≤ 5 ton system must meet or exceed: 16.2 SEER2 and 7.7 HSPF2 for Split systems or 15.2 SEER2 and 7.2 HSPF2 for Packaged systems 3) AHRI certificate of new system is required. 4) Paid-in-Full invoice submitted must state brand and model number of furnace being replaced AND brand name, model number(s) and serial number(s) of ALL parts for the new unit installed. 5) Installation must be performed by a contractor on IID's Participating Contractor (www.iid.com/ParticipatingContractors), unless self-installed. Limit one gas-to-electric rebate per installation address.					
P. HVAC System	Tier 1 \$125 / ton Tier 2 \$200 / ton Tier 3 \$300 / ton	Configuration	Tier	SEER2	EER2	HSPF2	
		Split	1	< 45,000 Btuh	15.2	11.5	7.6
				$\geq 45,000$ Btuh	14.8		
			2	< 45,000 Btuh	16.2	11.8	7.7
				$\geq 45,000$ Btuh	15.8		
			3	< 45,000 Btuh	17.1	11.8	7.8
				$\geq 45,000$ Btuh	16.8		
		Packaged	1	< 65,000 Btuh	14.3	11.0	6.7
			2		15.2	11.5	7.2
		Must meet the following to qualify: 1) Paid-in-Full Invoice with brand name, model number(s) and serial number(s) of ALL parts included. 2) AHRI certificate required. 3) New ducted ≤ 5 -ton system must meet both SEER2 and EER2 ratings for Air Conditioner or both SEER2 and HSPF2 for Heat Pump. 4) Installation must be performed by a contractor on IID's Participating Contractor (list at www.iid.com/ParticipatingContractors), unless self-installing.					

*For a list of qualifying ENERGY STAR equipment, visit www.EnergyStar.gov.

**Rebate amounts cannot exceed 50% of the total purchase price and/or installation cost or total service cost.

EQUIPMENT ELIGIBILITY OVERVIEW – NON-RESIDENTIAL

Energy Rewards Program for Non-Residential Customers

Through the Energy Rewards Program, business and other non-residential customers can implement a number of retrofits to help keep energy costs down, improve comfort and safety in their internal and external environments and promote environmental stewardship. Below are products supported through the Energy Rewards Program.

Programmable Thermostats

Programmable thermostats that meet Title 24 requirements must have the ability to automatically adjust the temperature setting of your heating and cooling system at pre-selected times to ensure energy is consumed only when needed. The system fan switch must have an “on” feature that circulates air continuously. IID’s incentive for qualified programmable thermostats is \$50 per qualified thermostat or the purchase price, if less than \$50 (excluding taxes).

Vending Misers

Vending misers reduce the energy consumption of vending machines by using an occupancy sensor to power down the lights and compressor. A temperature sensor powers the machine as needed to keep items at the appropriate temperature. IID offers an \$80 incentive per vending miser installed on qualified vending machines for business customers.

Packaged Terminal Air Conditioners and Heat Pumps (PTAC)

PTAC and packaged heat pumps are through-the-wall, self-contained units that are less than 24,000 BTU/H in cooling capacity. IID’s efficiency standards for PTAC units are 20 percent higher than the current Title 24 standard and are displayed in the table below.

Appliance	Minimum EER2 for Incentive
Packaged terminal air conditioners and heat pumps	≥12.7

Non-Residential and Industrial HVAC Equipment

Minimum Seasonal Energy Efficiency Ratios (SEER2), Energy Efficiency Ratios (EER2) or Heating Seasonal Performance Factors (HSPF2) for the incentive amounts are based on exceeding Title 24 minimum standards and are included in the numbers presented below.

HVAC SYSTEMS - 5 TONS OR LESS					
Central Air Conditioner and Heat Pump Systems					
Configuration	Tier		SEER2	EER2	HSPF2
Split	1	< 45,000 Btuh	15.2	11.5	7.6
		≥ 45,000 Btuh	14.8		
	2	< 45,000 Btuh	16.2	11.8	7.7
		≥ 45,000 Btuh	15.8		
	3	< 45,000 Btuh	17.1	11.8	7.8
		≥ 45,000 Btuh	16.8		
Packaged	1	< 65,000 Btuh	14.3	11.0	6.7
	2		15.2	11.5	7.2

EQUIPMENT ELIGIBILITY OVERVIEW – NON-RESIDENTIAL

HVAC SYSTEMS - 5 TONS OR MORE

Central Air Conditioner (Split and Packaged)

Tonnage	BTU/Hr	EER2 based on EnergyStar
≥ 5 to < 11.25	≥ 65,000 to <135,000	12.7
≥ 11.25 to < 20	≥135,000 to <240,000	12.2
≥ 20 to < 30	≥240,000 to <760,000	11.7

≥ 20 to < 30 was extrapolated from EnergyStar

Above 5 ton units = \$75/ton

Lighting

Although lighting is no longer incentivized through this program, your non-residential lighting project may qualify for an incentive through IID's Custom Energy Solutions Program (CESP). For more information, please visit <http://www.iid.com/CESP> or call 1-760-482-3682.

Energy Efficient Motors

Motors covered under this program must be new, three-phase, induction motors, NEMA Design A & B, from at least 1 HP in size to 200 HP ODP or TEFC motors with 1200, 1800 or 3600 RPM and operate at least 2000 hours per year. These motors are used for HVAC fans, pumping and conveyance applications and are based on California's Title 24 standards. The following are the minimum nominal full-load motor efficiencies and incentives for permanently wired, three-phase motors.

OPEN DRIP PROOF (ODP)				
SIZE HP	Speed (RPM) Customer			Customer Incentive (\$/Motor)
	1200	1800	3600	
	NEMA Nominal Efficiency			
1	82.5%	85.5%	77.0%	\$35
1.5	86.5%	86.5%	84.0%	\$35
2	87.5%	86.5%	85.5%	\$35
3	88.5%	89.6%	85.5%	\$40
5	89.5%	89.5%	86.5%	\$50
7.5	90.2%	91.0%	88.5%	\$60
10	91.7%	91.7%	89.5%	\$70
15	91.7%	93.0%	90.2%	\$80
20	92.4%	93.0%	91.0%	\$90
25	93.0%	93.6%	91.7%	\$135
30	93.6%	94.1%	91.7%	\$230
40	94.1%	94.1%	92.4%	\$300
50	94.1%	94.5%	93.0%	\$320
60	94.5%	95.0%	93.6%	\$355
75	94.5%	95.0%	93.6%	\$540
100	95.0%	95.4%	93.6%	\$720
125	95.0%	95.4%	94.1%	\$945
150	95.4%	95.8%	94.1%	\$1260
200	95.4%	95.8%	95.0%	\$1260

EQUIPMENT ELIGIBILITY OVERVIEW – NON-RESIDENTIAL

TOTALLY ENCLOSED FAN COOLED				
SIZE HP	Speed (RPM) Customer			Customer Incentive (\$/Motor)
	1200	1800	3600	
	NEMA Nominal Efficiency			
1	82.5%	85.5%	77.0%	\$35
1.5	87.5%	86.5%	84.0%	\$35
2	88.5%	86.5%	85.5%	\$35
3	89.5%	89.5%	86.5%	\$40
5	89.5%	89.5%	88.5%	\$50
7.5	91.0%	91.7%	89.5%	\$60
10	91.0%	91.7%	90.2%	\$70
15	91.7%	92.4%	91.0%	\$80
20	91.7%	93.0%	91.0%	\$90
25	93.0%	93.6%	91.7%	\$135

125	95.0%	95.4%	95.0%	\$945
150	95.8%	95.8%	95.0%	\$1260
200	95.8%	96.2%	95.4%	\$1260

For motors larger than 200 HP, please contact IID's Energy Management and Strategic Marketing Section at (760) 482-3673.

QUESTIONS AND COMMENTS

At IID, we strive to develop and implement effective energy efficiency programs and services that help customers reduce energy consumption, thereby reducing energy costs. If you have comments or questions, please contact us through the Rebate Processing Center.
